
Neil Lawrence

Neil Lawrence is the DeepMind Professor of Machine Learning at the University of Cambridge and a Senior AI Fellow at the Alan Turing Institute. A leading voice on the real-world impact of artificial intelligence, Neil brings over 25 years of experience in machine learning research and deployment to his insightful talks.

As a former Director of Machine Learning at Amazon, Neil offers a unique perspective on the practical challenges of implementing AI in large-scale industrial systems. His work spans from the cutting edge of AI research to its applications in developing nations, giving him a global view of AI's potential and pitfalls.

Neil is known for his ability to demystify complex AI concepts for non-technical audiences. He explores thought-provoking questions about the future of human-AI interaction, data privacy, and the ethical implications of AI deployment. His book, 'The Atomic Human,' delves into what AI means for our identity and society.

A compelling and engaging speaker, Neil combines technical expertise with a broader understanding of AI's societal impact. He challenges audiences to think critically about our AI-driven future and offers valuable insights for businesses navigating the rapidly evolving landscape of artificial intelligence.
