

MICHIO KAKU

WORLD RENOWNED
FUTURIST

Dr. Michio Kaku is a world renowned theoretical physicist and futurist. He is also a bestselling author, acclaimed public speaker, and popularizer of science. He has appeared in many television programmes on BBC, the Discovery Channel, the History Channel, the Science Channel and a number of the network news channel.

The author of numerous international bestsellers, including "Physics of the Future: How Science Will Shape Human Destiny and Our Daily Lives by the Year 2100", Michio Kaku presents revolutionary developments in medicine, computers, quantum physics, and space travel that will forever change our way of life and alter the course of civilization itself.

Kaku writes regularly for major publications such as Time, Wall Street Journal, Discover Magazine, New Scientist Magazine, Astronomy and Wired. He has also hosted a CNBC series called The Edge: The Future of the Mind and had a cameo in the 2013 Brad Pitt blockbuster World Was Z.

He also recently appeared on CNN International to discuss about America's plan to send human to Mars by 2030 and discussed key initiatives around the world that are leading the way to new and better energy sources that will lead to greater sustainability and energy independence.

Dr. Michio Kaku will share with you his vision of the future and brings to you a different perspective on how future trends will bring new avenues to business and society.
